LOCATION: unnamed tributary to McCutcheon Creek for the Harvey Springs development, Williamson County 35.7564°N/-86.9172°W

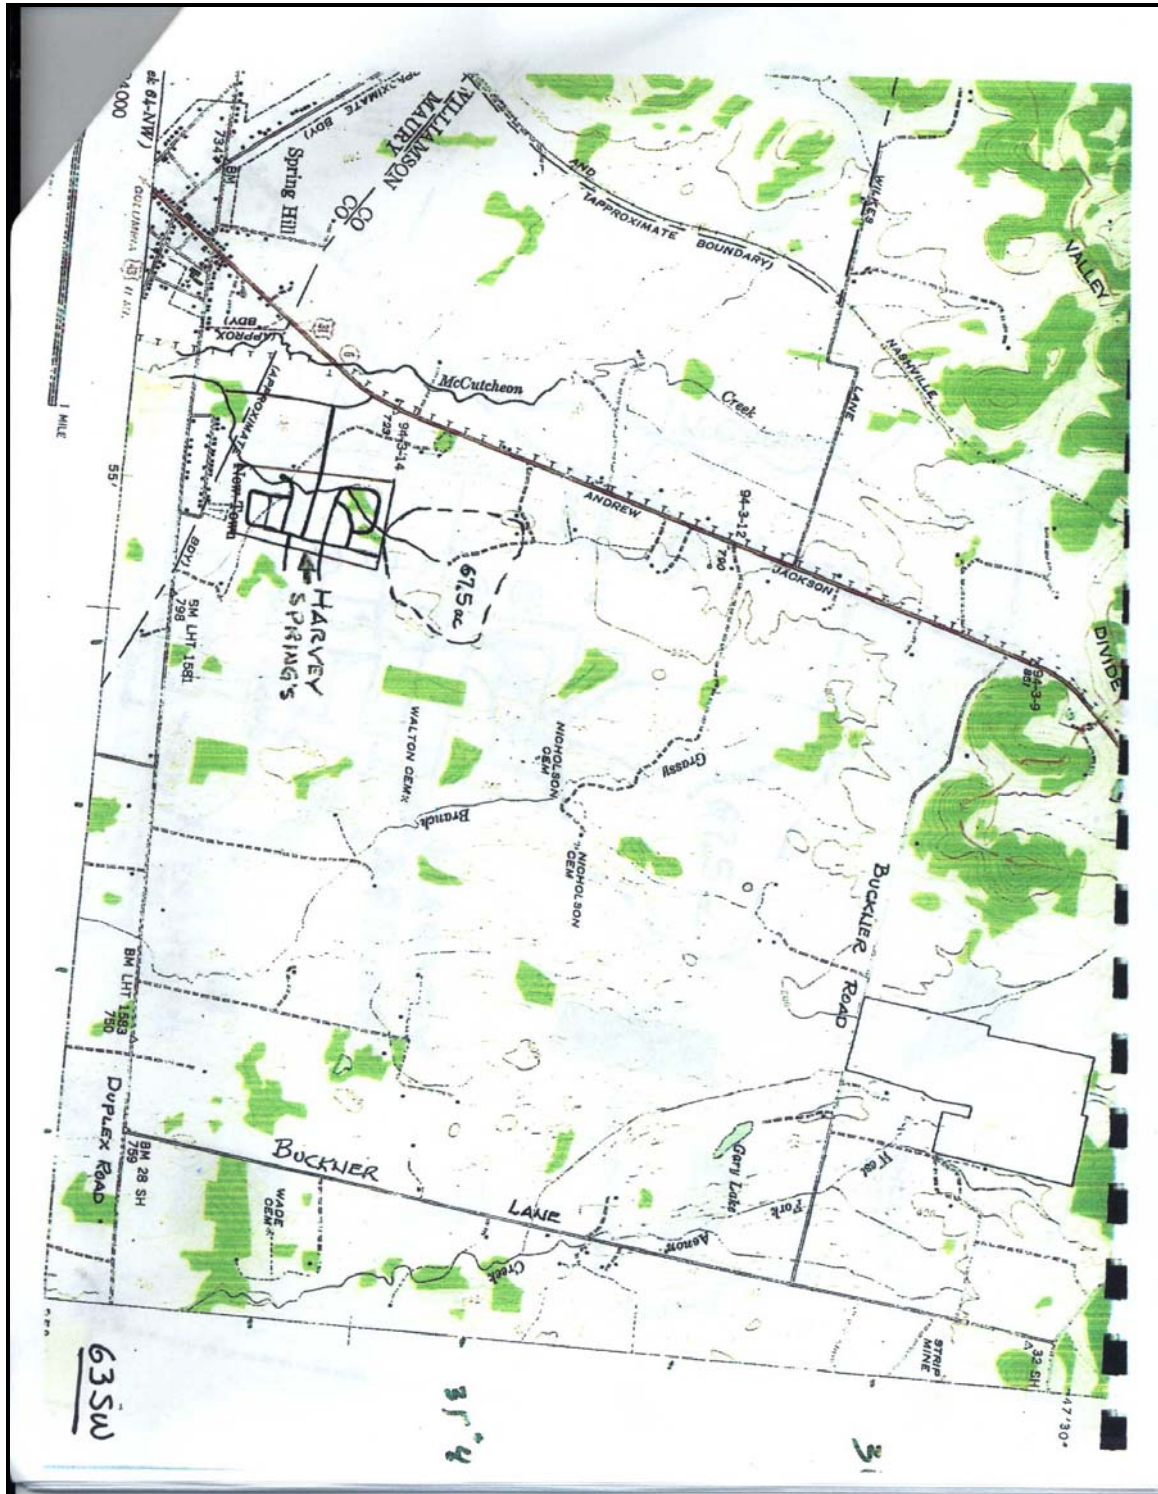

WATERSHED DESCRIPTION: Lower Duck Watershed, 303d listed due to loss of biological integrity due to siltation. Stream has intermittent flow, defined channel in most instances approximately 2 to 10 feet wide and approximately 2-5 feet deep. Much of the channel is incised. The substrate consists mostly of pebbles and soil.

PROJECT DESCRIPTION: The purpose of this project is to provide road, sewerage and water services for the Harvey Springs development. The applicant proposes four road crossings impacting approximately 260 feet of stream with 200 feet encapsulated. Each of the road crossings will be accomplished through the use of 60-inch by 38-inch RCP. The applicant also proposes five gravity sewer crossings. There will be no blasting for any of the utility line crossings. One crossing (near the wetland) shall be bored. Water lines are proposed at each road crossing. **In accordance with the Tennessee Antidegradation Statement (Rule 1200-4-3-.06), the division has determined that the proposed activity will not result in degradation to water quality.**
